## Growth in the Registers

---

### Explanatory notes:

Over the 10 year period 2007 to 2016, the total number of nurses on the register has grown from 203 948 to 287 458 – i.e. a net increase of 83 510 (46%).

- The Registered Nurse/Registered Midwife category has grown by 36 806 practitioners (+35%).
- The Enrolled Nurse/Enrolled Midwife category has grown by 32 976 practitioners (+81%).
- The Enrolled Nursing Auxiliary category has grown by 13 728 practitioners (+23%).

During the same period, the population of South Africa increased by 16% from approximately 47.850 million in 2007 (mid-year estimate) to 55.909 million in 2016 (mid-year estimate).

Population figures: Statistics South Africa (mid-year population estimates)

Nursing figures as at 31 December each year

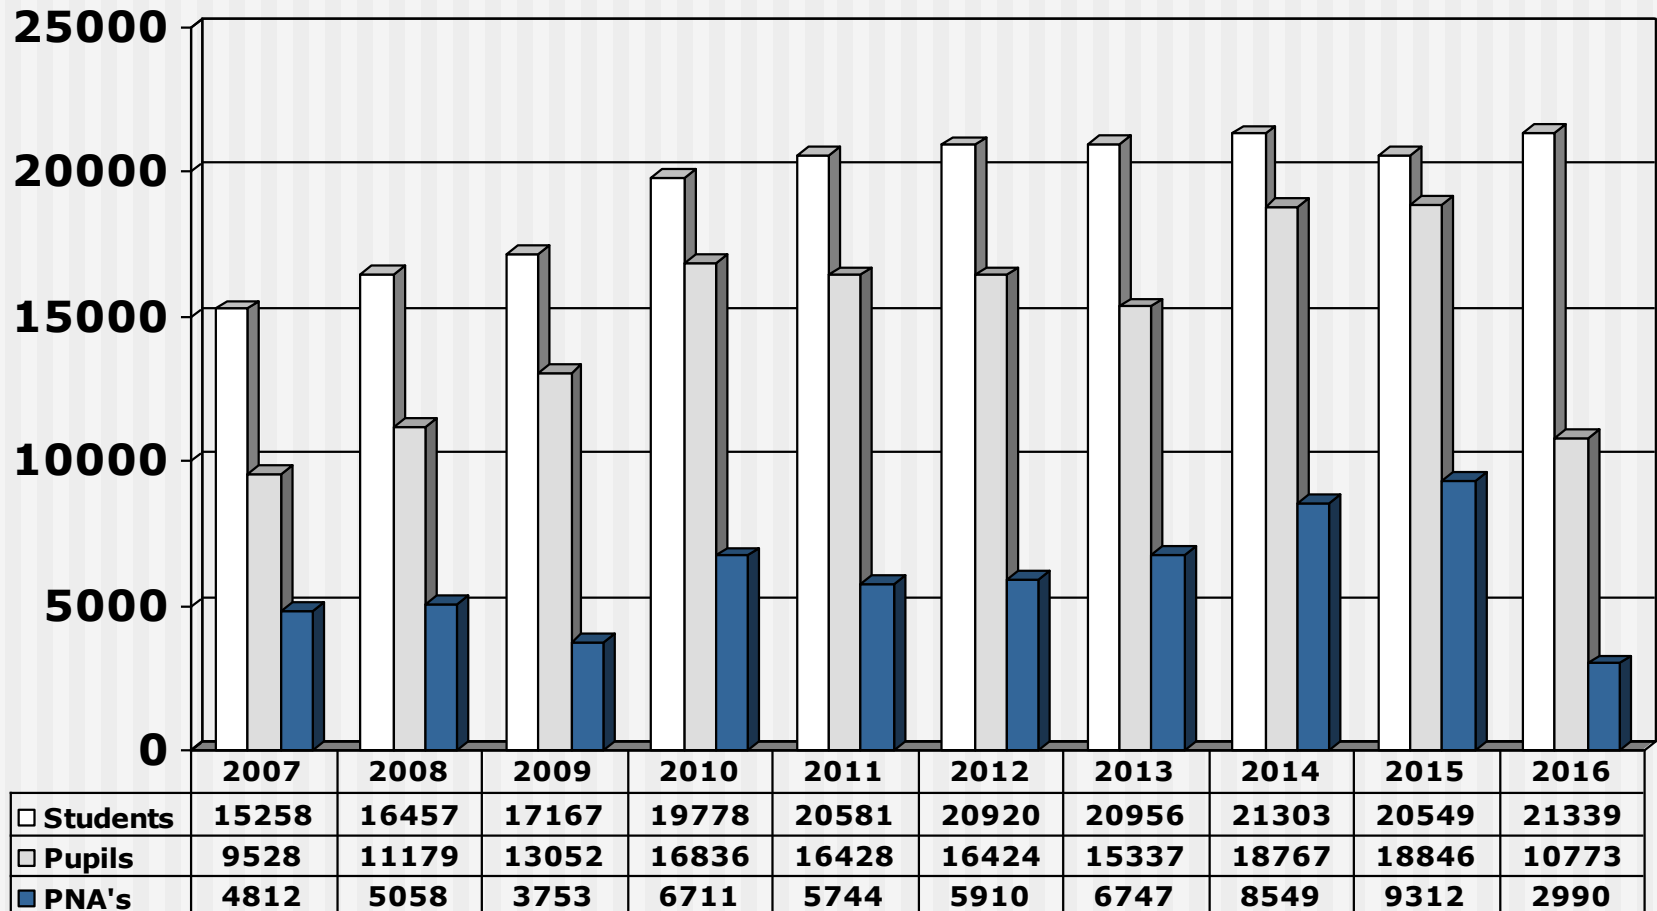

Excludes persons residing outside South Africa

**RN / RM** = Registered Nurses and Registered Midwives

**EN / EM** = Enrolled Nurses and Enrolled Midwives

**ENA** = Enrolled Nursing Auxiliaries

# S A Nursing Council Growth in Students/Pupils

## Growth in Students/Pupils

---

### **Explanatory notes:**

This chart reflects persons entering the nursing profession (as students/pupils) for the first time and does not include those busy with bridging or supplementary basic programmes.

When seeking to interpret the information in this chart please remember two important considerations:

1. These figures represent changing populations – there are complete intakes each year followed by terminations (for various reasons) and completions of large groups (usually from previous years).
2. The normal duration of training is different for the three categories – 4 years for Students, 2 years for Pupils and 1 year for Pupil Nursing Auxiliaries.

Figures as at 31 December each year

**Students** = Student Nurses and Midwives

**Pupils** = Pupil Nurses

**PNA's** = Pupil Nursing Auxiliaries
